

Experimental

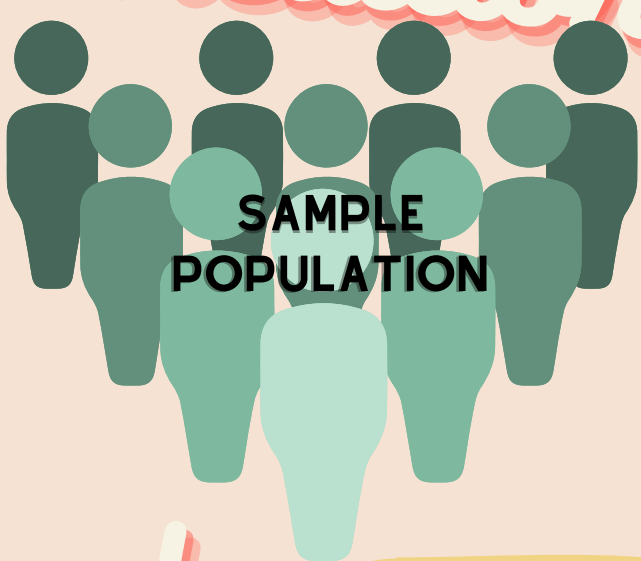

Each of you will get a and I'll look at the effect of the pill on reducing **stress**

Whoever is being studied!

Correlational

I'm NOT giving you anything but I'm interested to know if people who are already taking this pill tend to have a lower level of stress (i.e., a **correlation**)

Longitudinal

I'll test you guys for 10 times within 10 years and see if there's any noticeable changes in the pattern. **See you next year!**

Cross-sectional

I'm going to compare all these **different populations** at the **same time** - what are the similarities and differences that exist between these populations?

SAMPLE POPULATION

Microgenetic

I'm going to study each of you guys **repeatedly**. I'm interested in observing changes and conducting **in-depth analyses** on these changes
